Dear editor,

Please excuse me for taking some of your time. I would like to withdraw my manuscript titled "Efficacy Comparison of Microvascular Decompression and Rhizotomy in the Treatment of Glossopharyngeal Neuralgia: A Retrospective Analysis of 37 Cases" (1).

Our research team attempted to publish our research findings in different journals, but due to delayed internal communication, this led to the publication of this manuscript in two journals. When searching for relevant literature, readers may receive two articles with similar content, which will cause confusion for readers (1,2). Our original intention was not multiple submissions for one draft or redundant publication. We are very sorry for this and request the retraction of this manuscript. We deeply apologize for the serious consequences

caused by this and will do our best to compensate for the losses we have caused. Finally, we apologize once again to the editorial board and readers for the problems caused.

Thank you for your time and kind consideration.

Best regards

Yours sincerely,

Wei Shengcheng
